Want long-lasting yet immediately reversible contraception? Unhappy taking hormones long-term?

A Copper Intra Uterine Device (Copper-IUD) is the ideal choice

"Fit and Forget" contraception that is **more effective** than the pill and lasts up to 10 years!

Almost **all women of all ages** can have a Copper-IUD fitted - whether they have had children or not.

A Copper-IUD is smaller than you think!
The arms fold-in to be **narrower** than a drinking straw during fitting, and once in place the arms open out **smaller** than a 50p coin.

Please ask us for details.

For further information and to order free copies of this poster, please call **020 8869 6590** or email sexualhealth@durbin.co.uk
